DETAILED ACTION

Applicant's amendments filed January 19, 2006 have been entered.

Applicant's remarks filed January 19, 2006 have been considered, and are found persuasive. The outstanding rejections under 35 USC 112 and 103(a) are withdrawn.

Claims 1, 5-13, 16-19, 21-37 are pending.

Claims 5-6, 9, 13, 22, 23, 26, 29 are withdrawn from consideration as they are drawn to non-elected subject matter.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 11, 27, and 28 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The limitation "DS Po912" and "DS Pro821" are not described in the specification as to what these compounds are. Examiner notes that the instant specification merely discloses "Po912" and "po821", not "DS Po912" and "DS Pro821". Appropriate correction is required.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1617

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 7, 11, 12, 16-19, 27-28, 30-37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Where applicant acts as his or her own lexicographer to specifically define a term of a claim contrary to its ordinary meaning, the written description must clearly redefine the claim term and set forth the uncommon definition so as to put one reasonably skilled in the art on notice that the applicant intended to so redefine that claim term. *Process Control Corp. v. HydReclaim Corp.*, 190 F.3d 1350, 1357, 52 USPQ2d 1029, 1033 (Fed. Cir. 1999). The term "oligosaccharide" in claims 1 and 7 is used by the claim to mean "up to 10 disaccharide units", while the accepted meaning is "a carbohydrate that is made up of 2-10 monosaccharide units." (see Oligosaccharide in Chemical Dictionary, 5th ed., McGraw-Hill, 1987). The term is indefinite because the specification does not clearly redefine the term.

Warning

Applicant is advised that should claim 33 be found allowable, claim 37 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Allowable Subject Matter

Claims 8, 10, 21, 24, 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
